Product List

Model	Design	Dimensions	Color	MOQ
TENKENKO - V	450	450mm x 450mm	White	25pcs
	600	600mm x 600mm		25pcs

Note: The dimensions listed for this product are the dimensions of the usable opening after installation. The cut in the installation surface, prior to installation, will require an additional 30mm to be added to each dimension, i.e. V600 requires a cut opening of 630x630mm for a finished usable opening of 600x600mm.

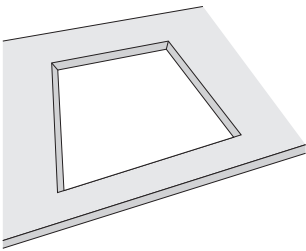

Model Design

Note: All models fit 9.5mm ceiling/gypsum board.

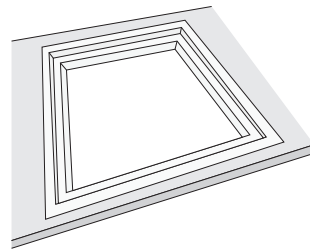

Installation Guide

1

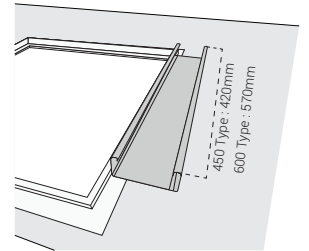

Cut an opening in the ceiling board to the appropriate size.
450 - 480x480mm
600 - 630x630mm

2

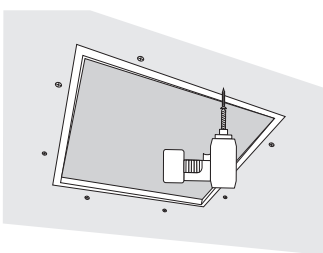

Insert the frame into the cut opening.

3

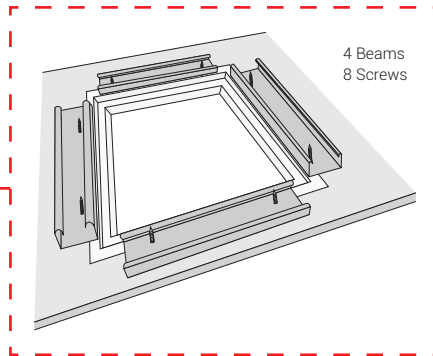

Set the supporting beams on top of the frame, sandwiching the frame between the beams and board.

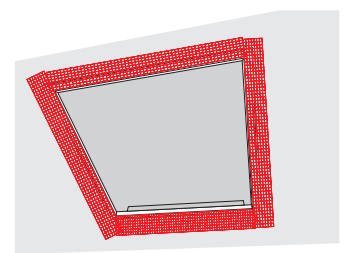

4

Attach the beams to the board by using 2 screws/beam. Make sure the frame remains sandwiched between the beams and the board.

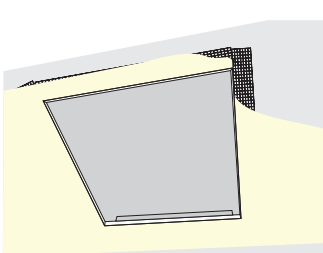

5

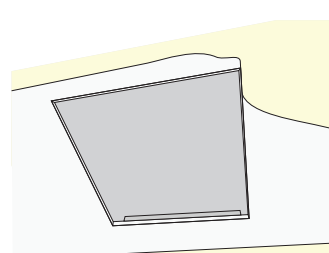

Attach reinforcement tape onto the board and frame, making sure the tape covers the visible portion of the frame and part of the board.

6

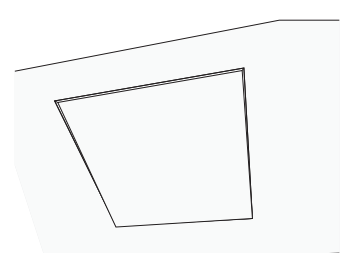

Spread putty around the frame and the rest of the surface.

7

Paint or wallpaper the surface.

8

Set the lid.
